

FINAL PROJECT – Individual Report [Week 4]

Group Name: JaiJaiSungLui

Group Number: Group 3

Name: Nathi Ritnatikul

Calendar Week: CW43

Date: [Oct 27 – Nov 2, 2025]

Week 4 Progress:

- Designed and developed 3D CAD models for the Manual Robot launcher arm to prepare for 3D printing and testing.
- Test and improve the Auto Robot coding and performance.
- Redesign the launcher mechanism and improve the results.

Challenges & Solutions:

- **Challenge 1:** The TT motor did not generate enough torque to throw large balls
- **Solution:** Redesign the arm to minimize the weight of the arm as much as possible to be able to launch it.
- **Challenge 2:** When driving the Manual Robot, it sometimes falls to the back.
- **Solution:** We add a support at the back to prevent the robot from falling.

Next Week Plan:

- 3D print and install the redesigned launcher arm.
- Testing both robots on the field.
- Finalize the CAD design based on real test results.
